RRSP season is here. Canada Life Can help

Submitted by Victoria on January 11, 2021 - 12:20pm

2020 was unpredictable. Help make sure your client's financial future isn't.

Check in with your clients

2020 and the market volatility that came with it have left many clients worried about their financial future. More Canadians are saving their money, withdrawing from the market and stashing it in savings and chequing accounts for safekeeping.

We're here to help. Check out our marketing toolkit for new materials to help your client conversations this RRSP season:

- We have a range of funds and investment solutions ? including managed solutions like our new **Risk-Managed Portfolios** ? which are designed to help protect clients from volatility. Clients can invest in these through their RRSPs or TFSAs.
- We also have **enhanced concepts** you can show your clients to help them understand key investment principles and the importance of investing through their RRSPs and TFSAs.
- Check out **new social media posts** and share them on your channels to help get the RRSP conversation started.

This year's contribution deadline is March 1. So, what are you waiting for? Let us help you prepare for your client conversations. Get your clients invested today, so they can save for tomorrow.
